European Competition in North America

MAIN IDEA

European countries competed with Spain for control over territory in the Americas.

WHY IT MATTERS NOW

European culture has strongly influenced American culture.

TERMS & NAMES

Henry Hudson

John Cabot

Giovanni da Verrazzano

Jacques Cartier

Spanish Armada

Samuel de Champlain

New France

ONE EUROPEAN’S STORY

In 1609, the Englishman Henry Hudson sailed under the Dutch flag from Europe. He hoped to find a route to China. Arriving at the coast of present-day New York, he sailed up the river that now bears his name. Hudson described what he saw.

A VOICE FROM THE PAST

The land is the finest for cultivation that I ever in my life set foot upon, and it also abounds in trees of every description. The natives are a very good people; for, when they saw that I would not remain, they... broke [their arrows] in pieces and threw them into the fire.

Henry Hudson, quoted in Discoverers of America

Hudson did not find a passage to Asia, but he led another expedition in 1610, this time for the English. In Canada, he discovered a large bay, today called Hudson Bay. After enduring a harsh winter, his crew rebelled. They put Hudson, his young son, and several loyal sailors in a small boat and set them adrift. Hudson’s party was never heard from again.

The Search for the Northwest Passage

Hudson’s voyages showed that some European countries hoped to find a westward route to Asia as late as the 1600s. While Spain was taking control of the Americas, other Europeans were sending out expeditions to find the Northwest Passage, a water route through North America to Asia.

One of the first explorers to chart a northern route across the Atlantic in search of Asia was the Italian sailor John Cabot. In 1497, Cabot crossed the Atlantic Ocean to explore for the English. He landed in the area of Newfoundland, Canada. He was certain that he had reached Asia and claimed the land for England. The next year he set sail once more.
hoping to reach Japan. He was never seen again. Even so, his voyages were the basis for future English colonies along North America’s Atlantic shore.

In 1524, another Italian, Giovanni da Verrazzano, set out under the French flag to find the Northwest Passage. He explored the Atlantic coastline of North America, but there was no passage to be found.

France tried again between 1534 and 1536 with the voyages of Jacques Cartier (ZHAHK kahr•TYAY). Cartier traveled up the St. Lawrence River to the site of present-day Montreal. At that point, rapids blocked the way and ended his search for the Northwest Passage. It would be almost 75 years before the French would return to colonize the region.

**Spain Responds to Competition**

French and English claims to North America angered Spain, which had claimed the land under the Treaty of Tordesillas. The tensions between Spain, England, and France stemmed from religious conflicts in Europe, such as the Reformation, which you read about in Chapter 1. These conflicts also led to fighting in the Americas.

Florida was one of the battlegrounds between the Spanish and the French. In 1564, a group of French Protestants, called Huguenots (HYOO•guh•NAHTS), founded a colony called Fort Caroline. Before long, Spanish troops under the command of Pedro Menéndez de Avilés arrived in that area. “This is the armada of the King of Spain,” he announced, “who has sent me [here] to burn and hang the Lutheran [Protestant] French.” Menéndez built a fort, St. Augustine, a short distance away. Then he brutally massacred the French.

**Spain and England Clash**

Religious differences and the quest for national power also led to conflict between Spain and England. In 1558, Queen Elizabeth I, a Protestant, came to the English throne. Spain, which was Catholic, plotted to remove the Protestant queen. But Elizabeth fought to defend England and challenge Spain’s power at sea.

Although England’s navy was not as powerful as Spain’s, the English fleet had many speedy ships with skillful sailors. Daring sailors, known as sea dogs, used these ships to attack the bulky Spanish sailing ships—called galleons—that brought gold and silver from the Americas.

Sir Francis Drake became the most famous of the sea dogs because of his bold adventures and attacks against the Spanish. In 1577, Drake began a three-year voyage that took him around the world. During this voyage,
he raided Spanish ports and ships in South America. He stole great amounts of treasure from them. When he arrived home in 1580, he was a national hero. Not only had Drake and his men hounded the Spanish, but they were also the first Englishmen to sail around the world.

The Defeat of the Spanish Armada

The attacks of Drake and other sea dogs enraged Philip II, the Spanish king. Determined to teach the English a lesson, Philip sent the Spanish Armada to conquer England and restore Catholicism to that nation. This fleet, made up of 130 ships, set out for England in the summer of 1588.

The English and Spanish navies met in the English Channel, which separates England from the European continent. In their smaller but faster craft, the English darted among the Spanish warships, firing deadly rounds with their cannons. Confused and crippled, the armada was retreating when it was hit by a severe storm. With half of its ships destroyed, the armada barely made it home.

Spain was still quite strong after the defeat of the armada. It quickly rebuilt its navy and maintained its large colonial possessions. But Spain would never again be as powerful as it was in 1588.

The English victory over Spain had two important effects. First, England remained independent and Protestant. Although England was less powerful than Spain, it had shown that it could defend itself. Second, Spain’s image suffered. The world saw that Spain could be beaten. Other nations joined England in challenging Spain.
English adventurers like Drake continued to attack Spanish interests abroad. In addition, England challenged Spanish claims to lands in North America, such as California and Newfoundland. Even so, England took a cautious approach to overseas expansion. The English government refused to provide money to start colonies. Instead, private citizens had to provide the money for colonization. As a result, England did not establish a successful colony in America until after 1600.

The French and Dutch Seek Trade

France and the Netherlands were also looking for ways to gain wealth through exploration and colonization. At first, their goal in the Americas was to find the Northwest Passage to Asia. When that search failed, they began to focus on North America itself.

The Frenchman Samuel de Champlain (sham•PLAYN) explored the St. Lawrence River. In 1608, he founded a fur-trading post at Quebec. This post became the first permanent French settlement in North America. Champlain’s activities opened a rich fur trade with local Native Americans. After a couple of decades, New France, as the colony was called, began to thrive.

At the same time, the Dutch were building a colony called New Netherland. It was located along the Hudson River in present-day New York. After Hudson’s voyage up the river in 1609, the Dutch built Fort Nassau in 1614, near the site of the modern city of Albany.

In 1626, the Dutch bought Manhattan Island from Native Americans. The Dutch then founded the town of New Amsterdam on that site, where New York City is currently located. New Netherland was soon thriving from the fur trade with Native Americans.

These early French and Dutch colonies, however, were small compared to the large empire Spain was building in the Americas. You will read about the growth of Spain’s American empire in the next section.
