Challenges to the New Government

**MAIN IDEA**
Washington established central authority at home and avoided war with European powers.

**WHY IT MATTERS NOW**
Washington’s policies at home and abroad set an example for later presidents.

**TERMS & NAMES**
- Battle of Fallen Timbers
- Treaty of Greenville
- Whiskey Rebellion
- French Revolution
- neutral
- Jay’s Treaty
- Pinckney’s Treaty

---

**ONE AMERICAN’S STORY**
In the West, American settlers met fierce resistance from Native Americans. Chief Little Turtle of the Miami tribe of Ohio had won decisive victories against U.S. troops.

In 1793, the Miami again faced attack by American forces. Little Turtle warned his people about the troops led by General Anthony Wayne.

**A VOICE FROM THE PAST**
We have beaten the enemy twice under different commanders. . . . The Americans are now led by a chief [Wayne] who never sleeps. . . . We have not been able to surprise him. Think well of it. . . . It would be prudent [wise] to listen to his offers of peace.

Little Turtle, quoted in *The Life and Times of Little Turtle*

While the council members weighed Little Turtle’s warning, President Washington was making plans to secure—guard or protect—the western borders of the new nation.

**Securing the Northwest Territory**
As a general, Washington had skillfully waged war. As the nation’s president, however, he saw that the country needed peace in order to prosper. But in spite of his desire for peace, he considered military action as trouble brewed in the Trans-Appalachian West, the land between the Appalachian Mountains and the Mississippi River. The 1783 Treaty of Paris had attempted to resolve the claims. The source of the trouble was competing claims for these lands. Some years later, however, Spain, Britain, the United States, and Native Americans claimed parts of the area as their own.

Spain held much of North America west of the Mississippi. It also claimed Florida and the port of New Orleans at the mouth of the

**CALIFORNIA STANDARDS**
- 8.3.5 Know the significance of domestic resistance movements and ways in which the central government responded to such movements (e.g. Shay’s Rebellion, the Whiskey Rebellion).
- 8.4.1 Describe the country’s physical landscapes, political divisions, and territorial expansion during the terms of the first four presidents.
- 8.5.2 Know the changing boundaries of the United States and describe the relationships the country had with its neighbors (current Mexico and Canada) and Europe, including the influence of the Monroe Doctrine, and how those relationships influenced westward expansion and the Mexican-American War.
- 8.5.3 Outline the major treaties with American Indian nations during the administrations of the first four presidents and the varying outcomes of those treaties.
Mississippi. For American settlers in the West, this port was key to trade. They carried their goods to market by flatboat down the Mississippi to New Orleans. They took Spanish threats to close the port very seriously. The Spanish also stirred up trouble between the white settlers and the Creeks, Choctaws, and other Native American groups in the Southeast.

The strongest resistance to white settlement came from Native Americans in the Northwest Territory. This territory was bordered by the Ohio River to the south and Canada to the north. Native Americans in that territory hoped to join together to form an independent Native American nation. In violation of the Treaty of Paris, the British still held forts north of the Ohio River. The British supported Native Americans in order to maintain their access to fur in these territories. Eventually, Native Americans and white settlers clashed over the Northwest Territory.

**Battle of Fallen Timbers**

Believing the Northwest Territory was critical to the security and growth of the new nation, Washington sent troops to the Ohio Valley. As you read in One American’s Story, this first federal army took a beating from warriors led by Little Turtle in 1790. The chief’s force came from many tribes, including the Shawnee, Ottawa, and Chippewa, who joined in a confederation to defeat the federal army.

After a second defeat in 1791 of an army headed by General Arthur St. Clair, Washington ordered another army west. This time Anthony Wayne, known as “Mad Anthony” for his reckless courage, was at its head.

The other chiefs ignored Little Turtle’s advice to negotiate. They replaced him with a less able leader. Expecting British help, Native American warriors gathered at British-held Fort Miami. On August 20, 1794, a fighting force of around 2,000 Native Americans clashed with Wayne’s troops. The site was covered with trees that had been struck down by a storm. The Native Americans were defeated in what became known as the **Battle of Fallen Timbers**.

**Reading History**

A. **Making Inferences**

What expectations might the Native Americans have had of the British as the tribes came into conflict with white settlers?

A. **Answer**

Native Americans probably expected the British to support them in their conflicts with American settlers since both were clashing with American settlers.
The Native Americans retreated to Fort Miami. The British, not wanting war with the United States, refused to help them. The Battle of Fallen Timbers crushed Native American hopes of keeping their land in the Northwest Territory. Twelve tribes signed the Treaty of Greenville in 1795. They agreed to cede, or surrender, much of present-day Ohio and Indiana to the U.S. government.

**The Whiskey Rebellion**

Not long after the Battle of Fallen Timbers, Washington put another army into the field. The conflict arose over the government’s tax on whiskey, part of Hamilton’s financial plan. From Pennsylvania to Georgia, outraged farmers resisted the tax. For them, whiskey—and the grain it was made from—were important products.

Because of poor roads, backcountry farmers had trouble getting their grain to market. Crops such as wheat and rye were more easily carried to market in liquid form, so farmers made their grain into whiskey. A farmer’s horse could haul only two bushels of rye but could carry two barrels of rye whiskey. This was an amount equal to 24 bushels of the grain. In addition, their customers paid more for whiskey than grain. With little cash to buy goods, let alone pay the tax, farmers often traded whiskey for salt, sugar, and other goods. The farmers used whiskey as money to get whatever supplies they needed.

**Obeying Rules and Laws**

As the Whiskey Rebellion shows, since the earliest days of the republic our government has made laws and punished those who broke them. These laws affect not only adult citizens, but young people as well.

Today, for example, communities across the country are trying to control the problem of juvenile crime by imposing curfews on young people. These laws require minors to be off the streets after a certain time, often ten or eleven at night. Penalties can be harsh. In certain communities, minors who break curfew laws can be detained, and their parents can be fined.

People who favor curfews believe such laws cut crime. Those who oppose curfews think such limits are the responsibility of parents and not the government.
In the summer of 1794, a group of farmers in western Pennsylvania staged the **Whiskey Rebellion** against the tax. One armed group beat up a tax collector, coated him with tar and feathers, and stole his horse. Others threatened an armed attack on Pittsburgh.

Washington, urged on by Hamilton, was prepared to enforce the tax and crush the Whiskey Rebellion. They feared that not to act might undermine the new government and weaken its authority. Hamilton condemned the rebels for resisting the law.

**A Voice from the Past**

Such a resistance is treason against society, against liberty, against everything that ought to be dear to a free, enlightened, and prudent people. To tolerate it were to abandon your most precious interests. Not to subdue it were to tolerate it.

*Alexander Hamilton, The Works of Alexander Hamilton*

In October 1794, General Henry Lee, with Hamilton at his side, led an army of 13,000 soldiers into western Pennsylvania to put down the uprising. As news of the army’s approach spread, the rebels fled. After much effort, federal troops rounded up 20 bare-foot, ragged prisoners. Washington had proved his point. He had shown that the government had the power and the will to enforce its laws. Meanwhile, events in Europe gave Washington a different kind of challenge.

**The French Revolution**

In 1789, a financial crisis led the French people to rebel against their government. Inspired by the American Revolution, the French revolutionaries demanded liberty and equality, and set out to create a government based on the will of the people. At first, Americans supported the **French Revolution**. By 1792, however, the revolution had become very violent. Thousands of French citizens were massacred. Then, in 1793, Louis XVI, the king of France, was executed.

Other European monarchs believed the revolution threatened their own thrones. France soon declared war on Britain, Holland, and Spain. Britain led the fight against France.

The war between France and Britain put the United States in an awkward position. France had been America’s ally in the Revolution against the British.
A 1778 treaty still bound the two nations together. In addition, many saw France’s revolution as proof that the American cause had been just. Jefferson felt that a move to crush the French Revolution was an attack on liberty everywhere. Hamilton, though, pointed out that Britain was the United States’ most important trading partner, and British trade was too important to risk war.

In April 1793, Washington declared that the United States would remain neutral, not siding with one country or the other. He stated that the nation would be “friendly and impartial” to both sides. Congress then passed a law forbidding the United States to help either side.

**Remaining Neutral**

Britain made it hard for the United States to remain neutral. Late in 1792, the British began seizing the cargoes of American ships carrying goods from the French West Indies.

Washington sent Chief Justice John Jay to England for talks about the seizure of U.S. ships. Jay also hoped to persuade the British to give up their forts on the Northwest frontier. During the talks in 1794, news came of the U.S. victory at the Battle of Fallen Timbers. Fearing another entanglement, the British agreed to leave the Ohio Valley by 1796. In Jay’s Treaty, the British also agreed to pay damages for U.S. vessels they had seized. Jay failed, however, to open up the profitable British West Indies trade to Americans. Because of this, Jay’s Treaty was unpopular.

Like Jay, Thomas Pinckney helped the United States reduce tensions along the frontier. In 1795, Pinckney’s Treaty with Spain gave Americans the right to travel freely on the Mississippi River. It also gave them the right to store goods at the port of New Orleans without paying customs duties. In addition, Spain accepted the 31st parallel as the northern boundary of Florida and the southern boundary of the United States.

Meanwhile, more American settlers moved west. As you will read in the next section, change was coming back east as Washington stepped down.
